

# IDEAL IMPLANT

Beautiful look.  
Natural feel.  
Peace of mind.

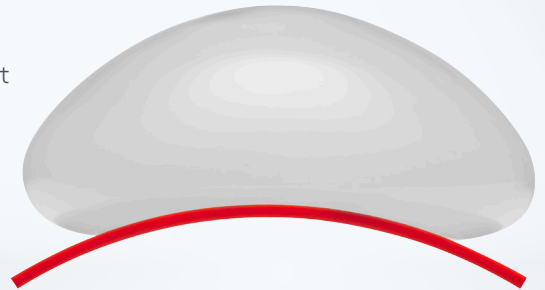

## Now there are three types of breast implants: saline, silicone gel and the NEW structured implant.

The structured IDEAL IMPLANT offers a natural feel and beautiful look with only saline inside for your peace of mind. Choose the IDEAL IMPLANT and enjoy advantages over saline and silicone gel implants.

### The IDEAL IMPLANT Difference

- Lower rupture rate and higher rupture strength—no silent rupture
- No MRI needed—look in the mirror to know that your implants are intact
- Filled with saline that is safely absorbed by the body if ruptured
- Allows a smaller incision than silicone gel implants
- Lower capsule contracture rate

You deserve beauty without compromise.
